

The Road to Modernization Just Got Smoother

Rocket Content Services helps accelerate your modernization journey without disrupting your day-to-day operations.

Rocket Content Services

Modernize? Yes. But it's how that really matters. And we get it. Organizations have legacy systems with custom code and content in multiple locations they can't afford to lose. Migration and modernization complexities that arise from storage on mainframes, in open source, cloud, and hybrid systems. The need to upgrade and maintain a full-service operation for employees and customers while keeping compliance and governance is simply overwhelming.

Increase Agility. Reduce Cost. Eliminate Risk.

Your modernization journey is unique to you. And with Rocket Content Services, so is your IT road map. Why? Because your business needs agility now more than ever. In an uncertain economy your organization must reduce costs and improve efficiencies. And the route there needs to eliminate risks not increase them.

How?

Be a mortgage company that increases worker productivity by **700%**, reduces closing document processing time by **67%**, and achieves data accuracy rates of over **90%**.

Be an insurance company that reduces infrastructure costs by **30%** and incorporates the federation of **10,000** users across 5 content systems.

Be a logistics company that has **32%** more hours dedicated to value added operations and saves **tens of thousands of dollars** in printing and paper costs.

—Actual Rocket customer outcomes

Rocket Content Services

Rocket Content Services provides a suite of product offerings to guide your organization at your pace. We don't sell a one-size-fits-all for modernization because there isn't one. We recognize the complexities of different industries, different legacy systems and different timelines for digital transformations.

The Content Services portfolio delivers incremental choice to our customers to manage mission critical information. It allows for content federation, giving end users and developers one interface to access all enterprise data. Through a single API, there is structured and layered access to information for security, compliance, and governance, at scale.

No matter where you start or where you finish in your modernization journey, the benefits remain the same.

Reduce costs and boost compliance

Deliver your customer promise

Manage critical data across a hybrid infrastructure

Eliminate redundant systems and vendors

Consolidate content and improve accessibility

Ensure data quality and governance

Rocket Content Services works hand in hand with established companies in banking and finance, insurance, healthcare, retail, and manufacturing. Industries that manage critical information with complex compliance standards, high customer service demands, and robust enterprise systems.

Businesses that can't afford to stop, have systems go offline or have data quality compromised.

The Content Services portfolio promotes novel ways of doing business, improves resilience, and your ability to respond to your market's demand for digital, workforce, and regulatory changes.

Rocket Content Services is an integrated family of products designed to work alone or in tandem. Best of all, the suite works with your enterprise systems and apps, including Microsoft 365 and SAP, to improve your data management and user experience, transform your business, and govern your information.

Rocket Mobius

Deliver, innovate, and solve your content management needs with flexible deployment and comprehensive service offerings so you can better manage growing data and information. Mobius will:

- Modernize at your pace – hybrid or all in
- Simplify workflows reducing costs and vendors
- Address content scalability, aggregation, and integration issues
- Govern business critical content

Do you have decades of investment in IT environments and business processes? Rocket Mobius helps you manage and distribute content keeping in line with your corporate policies, industry regulations, and government mandates to ensure compliance and business success.
